Part 2

Galerie d' Entomologie

There are carpenters' shops, taxidermists' studios, acres of shelves and specimen drawers, whole museums within the museum.

(...)

Entomology smells like mothballs and oil; a preservative that, Dr. Geffard explains, is called naphthalene.

—
Anthony Doerr

Information

In this part we will visit the Entomology department and transform our squares into octagons. To do this, the four sides are worked separately to make four additional corners with bees in them. When working Rounds 20-24, don't weave in the ends until after finishing Round 24, because that makes it easier to see the loop of the first and last st.

Note: St count is still given per side.

Notes:

- From Round 25 the sts per side are given for one side of the octagon, instead of the side of the square. When working the octagon, ALWAYS start near the corner above the corner hedges of the square, NOT the corner above the bee.
- The pattern for the sides will not always be symmetrical.
- If the FPsts are pulling, try to pull up the first loop of the st a bit higher.

How to make a French Knot: Thread a length of yarn of about 50cm (20in) through your darning needle. Weave the yarn through sts at the back where you are to be working a couple of times to secure it. Insert

your needle from back to front, pull the yarn through, place the tip of your needle in front of the bottom of the yarn strand, and wrap the yarn around the needle twice, insert the needle back through from front to back, making sure the yarn is kept wrapped tightly around the needle, and pull the yarn through. You've just made one French Knot. Weave the yarn through the back to the next butterfly wing and rep instructions until all four wings have French knots, fasten off.
