Part 3

Galerie de Botanique

Narrow corridors open to immense libraries; glass doors give way to hothouses overflowing with smells van humus, wet newspaper, and lobelia.

(...)

(...) they flip through two-hundred-year-old herbarium sheets bedecked with orchids and daisies and herbs.” “Botany smells like glue and blotter paper and pressed flowers.

Information

In this part we will visit the Galerie de Botanique. We will make a floral st pattern and work the octagon back into a circle. Please pay close attention to where the start and end of each round is and make sure it matches the pattern indication. Use st markers to help identify the start of each round if needed.

- The first sc after ch-2 sp is hidden, so please be mindful when determining where to start.
