Part 5

Grande Galerie de l' Evolution

The children watch engineers use pulleys to lift a fossilized dinosaur femur. They see a stuffed giraffe in a closet, patches of hide wearing off its back. They peer into taxidermists' drawers full of feathers and talons and glass eyeballs...

(...)

Biology smells like formalin and old fruit; it is loaded with heavy cool jars in which float rattlesnakes, the severed hands of gorillas.

Anthony Doerr

Information

In this part we will visit the Grande Galerie de l'Evolution, which is situated within the Jardin des Plantes and looks like a giant greenhouse from the outside. The inside is stunning with lots of walkways and an open space in the middle with a stunning display of animals like giraffes, antelopes and elephants.
